

## Structure Plane

### Information architecture

The website will feature a main central panoramic image as a landing page and navbar to the other areas.

### Interaction Design (IXD)

- A navbar will provide links to the other pages on the site as well as a direct link from the landing page to the main gallery.
- The navbar options will highlight to indicate the pathway to the option to the user.
- The site will feature a central panoramic image as the main background. The colour themes will be white and purple to compliment the main background and indicate pathway options.
- The main gallery page will not feature the 'main image' background. The navbar will be purple with a simple lightblue/grey background to enable the gallery images to stand out and be the main focus of attention.
- The links to Facebook, Twitter, Instagram and Youtube will change colour to indicate the pathway to the user.
